### **Stroke and Other Common Neurological Conditions**

#### **Harvard Medical School**

Jun. 2023

Description: *World Renown neurologist and neuroscience nurses from Massachusetts General Hospital share their expertise in a series of lectures regarding stroke treatment as it differs between the varying types of stroke patients. Neuroimaging regarding strokes as well as traumatic brain injuries, seizures, meningitis, encephalitis, and a variety of other common neurological conditions is also reviewed. Leading research regarding targeted treatments and management of the patients who suffer from these neurological conditions were also reviewed as well as best practices for case management and extended care.* **Harvard Medical School, Boston, MA**

### **The Science of Whiplash & Other Personal Injuries**

Apr. 2023

Description: *Presentation on the actual scientific basis for whiplash and other injuries that occur in automobile collisions, slip and fall, and other potential personal injuries. This presentation also included proper documentation of a personal injury case as well as going through a mock trial involving chiropractic care in a personal injury case* **Fetterman Events, Jackson, MS**

### **Understanding Whiplash Pt. 1 & 2**

Mar. 2022

Description: *Part 1 of this course details the biomechanics of low-speed rear impact collisions. This includes discussions on the S shaped curve of the spine, general magnitudes of force, factors associated with increased risk of injury and the types of injuries that result from these collisions. Part 2 of this series focuses on specific conditions and symptoms related to whiplash type injuries. Some of the conditions discussed include: the etiology of neck pain and headache, radiculopathy, TOS, myofascial pain syndrome, fibromyalgia, post-concussive syndrome, and TMJ*

### **Spinal Pain Syndromes**

Mar. 2022

Description: *Presentation on the clinical aspects of pain as well as the differences between Sclerotogenous, Myofascial, Visceral and Neuropathic pain syndromes. This included a review of the current literature of Bogduk, Lord, and Kuslich.*
